

DAVID B. CROCKER

Dear Caryn,

What a journey our four days have meant for how I am moving forward in my life today. I must admit I had some skepticism at the start. Could you guide me to a new vision for myself, how I would like to be in the world. Having had few careers in philanthropy and financial services I was not sure where I wanted to go next. I'd always relied on my own intuitions about the best ways to proceed. I also knew that my own intuitions had been influenced by old childhood messages and more current ways of being that I was not happy with. My life in family, work and in friendships was not as fully present and fulfilling as I wanted them to be. How do I change that? How do I bring more joy and gratitude in my life every day?

I needed change. Who could help, what process would it be, when and how could that happen. Then I met you and soon after made a decision to trust your process. Your success with Chart Your Own Course led me to believe your methodology is a good one and that you have a talent. I was right.

I made the decision to trust that whatever happened during our retreat would be useful for me and my new future. I could then begin to access the skills you have developed in guiding people toward new visions for themselves in the world. It really was that simple. Your intuitions, techniques, tools and 79 cards are a unique combination. Only you bring that all to the table. Lucky me for getting to be at the table with you.

I am surprised and delighted with the results of our work together and sincerely look forward to continued consultations as I move forward with your process. My life has changed. My family is delighted with my new way in the world. Joy is coming back to me in my work in the world. I am pleased to report that my life has less drama, more hope, more love and direction than I have had in many years. I do not think there can be a substitute for the clarity of vision I now have in my life. I feel refreshed, hopeful and grateful to be alive. Our work together helped bring more joy back into my life.

I thank you tremendously for the opportunity to work with you. I look forward to today and the future.

My best,

David
